

2K CLEAR - Plus

Description

- 2K Acrylic Urethane Clear Coat
- Medium Solids
- Cost effective
- 5L 26-2221405

Technical Summary

- High gloss
- Excellent through cure
- Excellent leveling and flow
- 2:1 no reducer

2K CLEAR - Plus

Working	Working process		
	Substrates:	• Basecoat	
	Pretreatment / Cleaning:	Clean with Duxone [®] Wax and Grease Remover	
	Application:	Use recommended respirators. Refer to relevant Material Safety Data Sheet (MSDS)	
		2:1 with Duxone [®] Plus 2K Hardener Medium or Duxone [®] Plus 2K Hardener Slow	
		No reducer required If necessary, up to 5% Duxone [®] 2K Thinner may be added	
∏ s		16 – 18s Ford Cup 4 / 20°C 16 – 18s DIN 4/ 20°C	
		1.3 - 1.4 mm 400 - 500 kPa 2 coats = 50 - 60 μ m	
		1.5 - 1.7 mm 400 - 500 kPa $2 \text{ coats} = 50 - 60 \mu\text{m}$	
<u>}</u>		 5 - 10 min / 20°C between coats 5 - 10 min / 20°C before force drying 	
		Air dry: 4 – 5 hours (optimum overnight) / 20°C Bake: 20-30 minutes / 60°C metal temp.

2K CLEAR - Plus

TECHNICAL DATA

Flashpoint:	Above +23°C
Raw Material:	Acrylic Urethane high gloss resin
Specific Gravity:	0.98g/mL
VOC:	553 g/L
Approx.	8.5 m ² /L at 50 microns DFT
Coverage:	
Potlife:	2-3 hours / 20°C
Cleaning of	Clean after use with Duxone® Gun Wash Solvent
Equipment:	
Important	• For professional use only
Remarks:	• For small spot repairs and similar applications, Duxone [®] Plus
	2K Hardener Fast may be used
	• Add 10-15% by weight Permasolid® Elastic Additive
	9050/805R Fexible additive for all commonly found types of
	plastic. Not necessary for UP-GF.
	Duxone 2K Clear Plus should first be mixed with 9050/805R.
	Then a suitable Duxone Plus Hardener is added 2:1 by volume.
