

Always use correct Personal Protective Equipment

DINITROL ML

Description

DINITROL ML is a corrosive prevention fluid with excellent penetration. When the solvent has evaporated, the product leaves a beige and soft protective film.

Substrates

DINITROL ML is designed for application in closed cavities, such as doors, frame members and exterior joints and crevices. The product can be used for rust-proofing of second-hand cars, trucks, buses and other vehicles.

Surface Preparation

Ensure substrates to be coated are clean and dust free.

Spray Equipment:

DINITROL ML is applied by spraying with manual or semi-automatic application equipment, and is suitable for either air mix or airless spraying.

Health & Safety

For detailed information refer to Safety Data Sheet (SDS).

No warranty either expressed or implied is made by RALI in this document, which is a technical data information sheet. The description of the product and its properties is for the sole purpose of identifying the product and does not constitute a warranty that the product or its properties shall conform to that description, nor is the description of the product and its properties a warranty by RALI that the goods are suitable for a particular purpose. Do not apply paint if relative humidity is above 85% or temperature is within 3 deg C of Dew Point being the MPT or Minimum Paint Temperature.
